To whom it may concern,

I would like to introduce myself as an energetic, self-motivating employee looking to grow a career with my education and skills. I am looking for a position where I can grow and create a career. I graduated from Eastern Florida State College with a Bachelor's Degree in Computer Information Systems Technology. The specialty was in Program/Software Development. I have recently graduated with a Master's Program in Digital Forensics from the College of Engineering and Computer Sciences at the University of Central Florida.

I encourage you to read my resume to see how my current education and past experiences will fit nicely in the position you are seeking to fill. I feel that I would need little guidance or assistance on achieving goals set to me. I am a team player as well as a team leader and feel that I fit well in any atmosphere.

Thank you for your consideration and for taking the time to review my application. I welcome the opportunity to learn more about options you may have in the computer science field. I hope to bring my experience and continuing knowledge with me to a position in your company.

Sincerely,

Jeffrey Williams

Enclosure
